

# D Resp Airway Stenosis

Record ID

## 1. Gold Standard Diagnosis

Has the patient had pulmonary function testing within the past 3 months?

- ☐ No  
☐ Yes  
☐ Not certain

Please upload the PFT document

Does the patient have airway stenosis confirmed by a laryngoscopy/bronchoscopy or CT imaging?

- ☐ No  
☐ Yes  
☐ Not certain

Confirmed by

- ☐ Confirmed by bronchoscopy/laryngoscopy  
☐ Confirmed by CT imaging

## 2. Disease Subtype

Disease Subtype

- ☐ Subglottic Stenosis  
☐ Bilateral Vocal fold immobility  
☐ Glottic Stenosis  
☐ Supraglottic Stenosis  
☐ Tracheal Stenosis  
☐ Multi-Level Upper Airway Stenosis

Bilateral Vocal fold immobility Subtype

- ☐ Posterior Glottic Stenosis  
☐ Bilateral Vocal Fold Paralysis  
☐ To be Determined/Not certain

## 3. Etiology

What is the etiology?

- ☐ Not certain / TBD  
☐ Iatrogenic (surgery/intubation)  
☐ Idiopathic  
☐ Auto-immune / granulomatous disease  
☐ Radiation  
☐ Other

Auto-immune / granulomatous disease Subcategory

- ☐ Granulomatosis with polyangiitis (GPA) (Formerly known as Wegner's disease)  
☐ Relapsing Polychondritis  
☐ Other

Other Subcategory

- ☐ GERD  
☐ Caustic Injury/Inhalation Injury  
☐ Infectious (Diphtheria, TB, Bacterial Tracheitis, other)  
☐ Recurrent Respiratory Papillomatosis  
☐ Other

#### 4. Disease Severity

Degree of Stenosis (Myer-Cotton Grade)

- ☐ Grade I  
☐ Grade II  
☐ Grade III  
☐ Grade IV

Degree of Stenosis (Myer-Cotton Grade)  
Picture for reference

Grade of Stenosis (Aziz Classification of Supraglottic Stenosis)  
Picture for reference

Degree of Stenosis (Bogdasarian Classification)

- ☐ Class 1  
☐ Class 2  
☐ Class 3  
☐ Class 4

Grade of Stenosis (Aziz Classification of Supraglottic Stenosis)

- ☐ Grade 1  
☐ Grade 2  
☐ Grade 3  
☐ Grade 4  
☐ Unsure

Degree of Stenosis (Bogdasarian Classification)  
Picture for reference

Grade of Stenosis (Aziz Classification of Supraglottic Stenosis)

- ☐ Grade 4T  
☐ Grade 4G  
☐ Grade 4TG

How would you subjectively classify the overall degree of stenosis?

- ☐ Mild  
☐ Moderate  
☐ Severe

#### 5. Treatment obtained

What treatment has the patient undergone for their stenosis?

- ☐ No treatment  
☐ Surgery  
☐ In-office treatment

Surgery options

- ☐ Endoscopic intervention with Laser and Balloon dilation and steroid injection  
☐ Endoscopic laser wedge excision  
☐ Laryngotracheal reconstruction  
☐ Laryngotracheoplasty (Maddern procedure)  
☐ Tracheostomy

In-office treatment options

- ☐ Steroid injection(s)  
☐ In-office dilation  
☐ In-office laser
