D Neuro Amyotrophic Lateral Sclerosis Als

Record ID	
1. Gold Standard Diagnosis	
Does the patient meet the diagnostic criteria for A	Amyotrophic Lateral Sclerosis (ALS) based
on:	
(1) Progressive motor impairment documented by history or repeated clinical assessment, preceded by normal motor function;	○ Yes○ No○ Not certain
(2) presence of UMN and LMN signs in at least 1 body region (with UMN and LMN dysfunction noted in the same body region if only one body region is involved) or LMN dysfunction in at least 2 body regions;	YesNoNot certain
(3) investigations excluding other disease processes.	YesNoNot certain
Does the patient meet the diagnostic criteria for Amyotrophic Lateral Sclerosis (ALS) based on the criteria above?	
2. Type of ALS	
Specify the type of ALS in the patient:	○ Sporadic ALS○ Familial ALS○ Spinal/limb-onset ALS○ Bulbar-onset ALS
If you selected "Familial ALS", please specify the genetic mutation if known:	
3. Etiology	
What is the suspected or known etiology of ALS in the patient?	☐ Genetic factors☐ Environmental factors
Genetic Factors	☐ C9orf72 mutation☐ SOD1 mutation☐ Other genetic factors
If you selected "Other genetic factors", please specify:	
If you selected "Environmental factors", please specify:	

4. Clinical Presentation	
Describe the clinical features and symptoms of ALS in the patient:	 □ Upper Motor Neuron Signs (e.g., spasticity, hyperreflexia) □ Lower Motor Neuron Signs (e.g., muscle weakness atrophy, fasciculations) □ Bulbar Symptoms (e.g., dysarthria, dysphagia) □ Respiratory Involvement
5. Disease Progression	
Please provide information on the current stage and progression of ALS:	Early StageIntermediate StageAdvanced Stage
6. Neurological Assessment Please provide results from relevant neurological	al assessments:
Revised ALS Functional Rating Scale (ALSFRS-R) score:	
Forced Vital Capacity (FVC) percentage (if measured):	
Other neurological assessment (please specify):	
7. Imaging and Diagnostic Tests	
Electromyography (EMG) and Nerve Conduction Studies (NCS):	
Magnetic Resonance Imaging (MRI) of the brain and spinal cord:	
Lumbar Puncture (if performed, specify findings):	
Genetic testing (if applicable, specify results):	
Other diagnostic tests (please specify):	
8. Treatment and Management	
Has the patient undergone any treatment or interventions for ALS?	Yes No
Yes	☐ Medications☐ Supportive Care

₹EDCap°

Medications (if applicable):	 Riluzole Edaravone Sodium phenylbutyrate/taurursodiol Tofersen Symptomatic treatment (e.g., for spasticity, pain) Other
If you selected "Other", please specify:	
Supportive Care:	 ☐ Physical therapy ☐ Occupational therapy ☐ Speech therapy ☐ Respiratory support (e.g., non-invasive ventilation) ☐ Nutrition and swallowing support ☐ Psychotherapy ☐ Other
If you selected "Other", please specify:
